February 2022

Dear Parent / Carer,

Re: YEAR 11 - SUMMER EXAMINATIONS 2022

The attached information includes all of the examinations / qualifications your child is entered for in summer 2022. The Statement of Entry (yellow sheet) shows details of the all the units and certification entries that have been made by the school on behalf of your child. Some of the units are listed with a tier of entry, where appropriate.

There will be a date and time for those units that are assessed with an external written exam (blue sheet). At a later date your child will receive details of the location and seat number for each of these examinations.

Some units are NEA (non-examined assessments) and these will not appear on your child's individual timetable. The deadline dates for NEA components are set by subject departments and must be adhered to. Your child will be notified of their marks for any NEA prior to submission to the exam boards.

Details of venues and resolutions of any clashes (where two or more exams are scheduled to start at the same time) will be provided to the affected students nearer the time.

Please ensure all personal details are checked on the enclosed timetable, i.e., spelling of legal forename and surname (this is how it will appear on examination certificates) and date of birth. Also check that all subjects appear on the timetable for which your child is expecting to be entered. If anything is incorrect, please contact either Mrs. Titley or Mrs. Butler, via email or telephone immediately.

This year, written examinations will begin on **Monday 16th May** and continue up to and including **Wednesday 29th June 2022**. As previously advised earlier in the academic year, the school has a duty to ensure that both students and parents are aware that the awarding bodies have designated a contingency period up to and including Wednesday 29th June for examinations. The designation of the 'contingency period' within the common examination timetable is in the event of national or local disruption to examinations. It is part of the awarding bodies' standard contingency planning for examinations. Therefore, students **must** remain available until Wednesday 29th June 2022 should an awarding body need to invoke its contingency plan.

Attendance to all examinations is **compulsory**. Students who do not attend without **supporting appropriate evidence** will obtain 'No Result' and may be expected to pay the cost of the entry fee which is determined by the examination board.

Students must bring their own equipment required for every exam and they must **arrive 20 minutes prior to the scheduled exam start time**. Students will not be allowed to leave the exam until the full time duration has lapsed. As these are public exams, start times or sessions cannot be changed to suit the school or individual students.

As advised previously, it is important that your child reads and fully understands all exam protocol and reads the exam literature that can be found on the [school's website](#)

P.T.O

Please impress on your child the importance of revising beforehand. To help with final revision preparation, your child may find it beneficial to look at past exam papers, which can be accessed from the exam boards' websites. Details of the specifications and links to the websites can be found in the [Examinations - Student Handbook](#). Furthermore, this document may also assist in answering any questions you have regarding the exam process.

How has the tier of entry been determined for my child for GCSE Maths?

In certain subjects such as maths, there are two tiers: foundation and higher. Each tier is targeted at a range of numerical grades: 9 to 4 on the higher tier and 5 to 1 for the foundation. Your child's maths exam entry has been determined by how well they performed in the November / December mock period. However, there is a timeframe, following submission of the entries to the exam board whereby we can change a tier of entry and this will be decided on how your child performs during the re-mock period, which commences the week of 14th March. At least a Grade 5 must be achieved in order for the maths department to consider whether an amendment to the higher tier is in the best interest of the student.

Please do not hesitate to contact the exams office if you have any queries. May we take this opportunity to wish your child good luck with all their future exams.

Yours faithfully,

Mrs. A. Titley

Examinations and Data Manager
